

## PROJECT RISK MANAGEMENT: TRAINING PROGRAMME

### Training for all the Project Team

HVR Consulting delivers a 12 module training programme covering all aspects essential to implementing best practice project risk management.

Our training is designed to meet the detailed requirements of specialised risk managers. However, because the training programme is modular in composition, our training is tailored to meet specific needs of all levels of personnel involved in project management.

### Providing a Flexible Approach

Our flexible approach means that training is relevant and personnel gain the right skills for their specific role. Through attending our training, all project team members are provided with risk management skills that are directly applicable to their day-to-day working environment.

Our matrix opposite aligns the applicability of our training modules with key areas of project management responsibility.
